Nine ideas for...

multimedia projects with an iPad

The iPad's portability, ease-of-use and wealth of apps make it the go-to tool for multimedia projects that are more about your curriculum than the technology.

1 ILLUSTRATE STORIES WITH STOP MOTION ANIMATION.
With Stop Motion Studio, students can quickly and easily illustrate a story of create a demo. Need to edit? Import videos into iMovie.

2 WRITE A BOOK.
The Scribble Press app lets students create their own ebooks with hundreds of great writing and drawing tools and templates.

3 TELL A STORY.
The Educreations app gives you a blank whiteboard to draw, type, import image and record your voice and on-screen activity. Great for sharing student work with parents.

4 MAKE A MUSIC VIDEO.
Let students show their creativity with the VidRhythm app. Collect video samples and mash them together into fun remixes.

5 REENACT HISTORY.
...Or explain a science concept or other topic being studied: use iMovie to film, edit, produce and share a movie that brings learning to life.

6 CREATE AN AUDIO TOUR FOR AN ART DISPLAY.
Use Fotobabble to photograph student art and record up to three minutes of audio for each image. This app automatically publishes to the web for easy sharing.

7 RECORD AND EDIT A PODCAST.
Let students create a radio show using GarageBand to record, edit and create background music. Finished projects can be shared easily as mp3 files.

8 ILLUMINATE THE CREATIVE PROCESS.
Use the Time Lapse Camera HD app to take photos as students create artwork, then make a time lapse video to highlight the creative process.

9 CREATE MOVIE TRAILER BOOK REPORTS.
Use iMovie's built-in Trailer templates to easily create a fun, exciting book report that can be shared on the school TV network.

UEN offers a wide range of ed-tech classes for educators, online and in-person, plus Faculty Lounge webinars. Learn more at **www.uen.org/development/**.
