

# Utah Fish Project

This project will help you learn about a specific fish found in Utah. Use a large poster sized piece of paper. Guidelines for the project are as follows:

1. Divide your poster into four equal sections.
2. Draw a circle or oval in the middle of your poster.
3. Assign each person in your group to be in charge of a section of the poster.

Circle: Write the name of your fish in the middle circle in a creative way.

Box 1: Draw a picture of your fish. Use correct information and coloration.

Box 2: Draw a map of Utah showing the geographical location where your fish is found.

Box 3: Write ten interesting facts about your Utah fish. Be unique and creative.

Box 4: Draw the life cycle of your fish.

4. Have fun with this project. Please remember to be careful, colorful and detailed! Take your time and do your best. Use a ruler to help keep your writing even and neat. Space letters correctly. Be careful with your illustrations.
5. Remember, you may have suggestions from parents or others, but this needs to be the work of your school group.
