

Operation Song

(Sung to the tune of “Are You Sleeping?”)

Operations, operations, there are four, there are four
Addition and subtraction, multiplication, and division
There are four, there are four

In addition, in addition, Get them all, get them all
Add up all the addends, order doesn't matter
Get the sum, get the sum

In subtraction, in subtraction, take away, or compare
Find out what is left and you will get the difference
Minuend, subtrahend

Multiplication, multiplication, put together, equal groups
Multiply the factors, you will get the product
Equal groups, get them all

In division, in division, Split the dividend, equally
You will get the quotient, sometimes a remainder
Divide it up, equal groups
