

Directions for Making a Mini-Lab Booklet

Each student will need five half sheets of the top half of the page and 1 copy each of the bottom half. Cut a piece of 9 x 12 construction page in half and staple in this order: construction sheet, question page, 5 observations pages, and construction sheet. Staple three times on the six inch side of the paper. Cut a piece of construction 6 inches by 2 inches long and fold over the ends covering the staples to give the booklet a completed look.
