

Name _____

The Night Sky Recording Sheet

Question: Why does it seem that objects like the sun, moon, and stars move across the sky?

Gather Information:

Hypothesis: I think that

Experiment: Draw what you see at each time in the appropriate box as you “rotate”.

Earth

11:00 p.m.

1:00 a.m.

3:00 a.m.

5:00 a.m.

10:00 a.m.

3:00 p.m.

Conclusion: The sun, moon, and stars appear to move across the sky because:
