## Probability Recording Sheet

Remember the following steps to conduct your own experiment as you complete the table:
Step 1: Decide how many times you are going to conduct the experiment.
Step 2: Write down the number and color of each tile.
Step 3: Write the Theoretical Probability fraction for each color.
Step 4: Pull out one tile at a time, tally the result; remember to replace the tile in the bag.
Step 5: After conducting the experiment, write the fractions for the actual outcomes.

| Step 1: <br> Total number of events: | Theoretical Probability | Experimental Probability |  |
| :---: | :---: | :---: | :---: |
| Step 2: <br> Objects | Step 3: <br> Write the Fraction | Step 4: <br> Tallies | Step 5: <br> Write the Fraction |
|  |  |  |  |
|  |  |  |  |
|  |  |  |  |
|  |  |  |  |

How did the Theoretical Probability compare to the Experimental Probability?

THINK ABOUT IT: What could you do to bring the Experimental Probability results closer to the Theoretical Probability results?
