

Mixed-Up Pieces

You want to play a game with your family but all of the game pieces are mixed up. Use the clues below to figure out which game pieces go with each game.

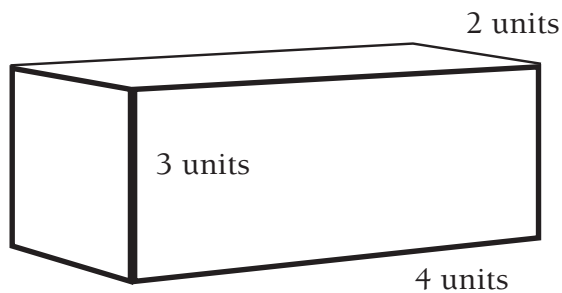

1. A spinner is needed in the game box that has a surface area of 88 square units. What is the name of the game missing the spinner?

2. A blue piece needs to be in the box with the smallest surface area. What game is missing a blue piece?

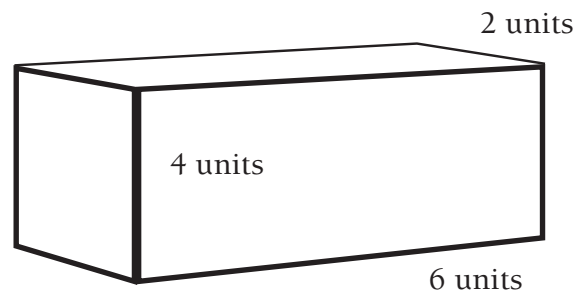

3. A die is supposed to be in the game box that has the largest surface area. Which game is missing the die?

4. Two cards are needed to play the game that has the box with a surface area of 94 square units. What game is missing two cards?

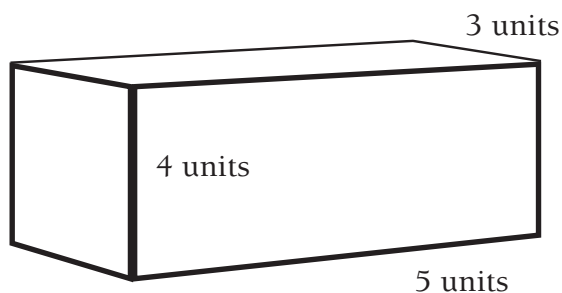

Whodunit?

Hoppy Frogs

Jammin' Jane
