

# Seasons Pictionary Cards

Directions: Form teams with students in the class. One person from the first team comes to the board to draw a Seasons Pictionary card. The students must draw a scientific picture to represent the term on their card. The first team tries to guess what their teammate is drawing. The guessing team gets one minute to figure out the seasonal term their teammate is drawing. If the card is not solved, the other team gets a chance to guess the solution. Play continues, altering teams each turn. Cards that are drawn and solved within the time limit earn a point.
