Star Clock March Apri/ **February** June December Fubut 19dm9jq92 October Big THE TIME IS Dipper STAR CLOCK North **Cassiopeia** Star Little Dipper Find the Big Dipper and the North Star, as shown on the face of your Star Clock. Face the North Star, as shown on the front of the clock. 3. Find the current month around the outside circle of the Star Clock. Put your thumb over the current month. Hold your Star Clock so the current month, marked by your thumb, is AT THE TOP. 4. Holding the large disc firmly with the current date at the top, turn the smaller disc until its stars line up with those in the sky. 5. Read the time in the window. 6. If you are on Daylight Savings Time, add one hour
