

## HELPFUL TWISTERS

Because you want to become a positive, contributing member of society, you want to get rid of negative things in your daily life. You know how destructive some things can be and you want to get rid of them . . . QUICKLY! A special tornado—designed to extract only garbage, trash, and useless debris from human nature—is visible, and you're looking forward to its powerful cleansing action. What things will this tornado destroy? What powerful, positive ideas will be left—things so powerful that all negativism will be washed away forever?

Identify and check off the dozen or so negative words on the next page and write them on the HELPFUL TWISTER. Then discuss with your peers how the powerful, positive things that are left can build rather than destroy your ability to become a good citizen. You might have differences of opinion regarding the connotations of some words, i.e., pity.
