

**Distributive Property Examples**

Date \_\_\_\_\_

Name \_\_\_\_\_

Example	My own example	My words
<p>1. <math>3(20 + 4) = 3 \cdot 20 + 3 \cdot 4</math>  <math>3(24) = 60 + 12</math>  <math>72 = 72</math></p>		<p>Use these words:                      parentheses, distribute,                      terms                      To _____ means to                      multiply both _____ in                      parentheses by the same                      factor. The factor is                      outside the _____.</p>
<p>2. <math display="block">\begin{array}{r} 37 \\ \times 5 \\ \hline 150 \\ 185 \\ \hline 185 \end{array}</math></p> <p><math>5(30 + 7)</math>  <math>5 \cdot 30 + 5 \cdot 7</math>  <math>150 + 35</math>  <math>185 = 185</math></p>		<p>Use these words:                      multiplying, property,                      factor                      I can apply the distributive                      _____ when I am                      _____ each number                      by the same _____.</p>
 <p><math>3 \times 4</math>      +      <math>3 \times 2</math>  <math>= 12</math>          +          6  <math>=</math>                  18</p>  <p><b>OR</b>  <math>= 3(4 + 2)</math>  <math>= 3(6)</math>  <math>= 18</math></p>		<p>Use these words: rows,                      add, factor, distributive                      property, multiply                      Since both tables have 3                      _____, we can _____                      the columns in both tables,                      then _____ that                      sum by 3. This is an                      example of the _____.</p>
 <p><math>P = 2l + 2w</math> or  <math>P = 2(l + w)</math>  <math>P = 2 \times 4 + 2 \times 5</math>  <math>P = 2(4 + 5)</math>  <math>P = 2(9)</math>  <math>P = 18</math></p>		<p>Use these words: length,                      width, perimeter,                      distribute, factor                      Since the formula for                      _____ asks for 2                      times the _____                      added to 2 times the                      _____, we can                      _____ a                      common _____                      of 2 to find perimeter.</p>
