

Geometry Vocabulary Sorting

1. Sort these words into three categories: Words I know, Words I have heard before, but am not confident about, Words I don't even recognize
2. Take the words you are confident about-words you know, and sort them now into three or more categories. Write the rule for placing a word into each of the categories you choose. Categories must be based on meaning of the word, not on things like short words and long words.

Triangle	Length	Circumference	Radius
Width	Quadrilateral	Square	Acute
Two-dimensional	Parallelogram	Height	Base
Rectangle	Pentagon	Obtuse	Octagon
Circle	Right	Face	Diameter
Hexagon	Angle	Congruent	Parallel
Perpendicular	Intersecting	Line	Vertex
