## Sketching Similar Triangles Rally Coach

For each problem on the grid below, a triangle has been sketched for you. A corresponding segment of a similar triangle has also been sketch. Use a proportion to determine how long a second corresponding side should be, and then sketch the similar triangle. Line segment $A B$ corresponds to line segment $D E$ in each problem.

|  |  |  |  |  |  |  | D | - |  |  | $\square$ |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
