

Name _____

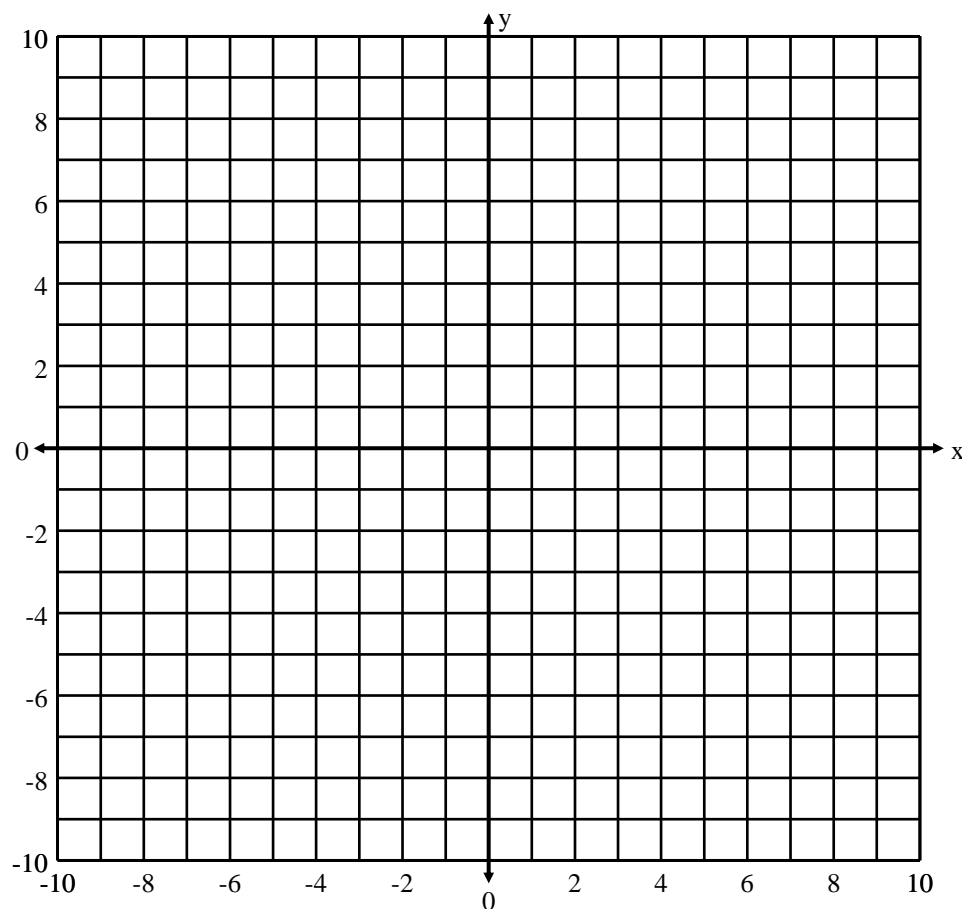

***Journal page: Graphing Integers on a
Coordinate Plane***

Here is a graphic to help me remember the direction each number in an ordered pair is telling me to move.

1. Plot 10 points on the coordinate plane. Label them A-J. Then write the ordered pairs for each point.

A.
B.
C.
D.
E.
F.
G.
H.
I.
J.

2. Someone has implanted a memory eraser in your brain that will wipe out your knowledge about graphing ordered pairs. You get to write yourself instructions so you can re-learn this in order to find \$1,000.000 dollars you have hidden for the future. On the back of this page, write your instructions to yourself. Make sure you write enough detail to really explain. You may give examples and draw diagrams to help.
