Team Challenge Questions and Answers

Name _____

Date _____

A challenging team is brings a data representation to the overhead. They will ask any two questions from 1-8 above and give the class a little time to think and discuss among team members. The challengers then select one person to answer. If correct, the responder's team gets 2 points. If the responder is incorrect, the challengers must answer correctly to earn the point. Write each question and your response.
