### Journal page: Graphing Integers on a Coordinate Plane

1) Fill in the blanks with these words to ideas for a rectangular coordinate system.  
X-Axis, Y-Axis, Origin, Quadrant I, Quadrant II, Quadrant III, Quadrant IV, point

Rectangular Coordinate System

2. Coordinates (ordered pairs) identify specific points on the rectangular coordinate system. Here is a graphic to help me remember where the numbers in an ordered pair are telling me to place a point.

3. Plot this ordered pair: (-6, 4). Explain here how you knew where to place the point on the coordinate system.
