

Internet Dangers and the Consequences PowerPoint Project

In groups of three to five students create a PowerPoint, at least ten slides, that will inform the class about your assigned subject. Make sure you have at least one or two students in your group who can organize a PowerPoint.

Organization:

- Each group will choose or be assigned one of the safety issues from the board.
- One or two students will be assigned to organize the presentation.
- One student will develop the PowerPoint with backgrounds, transitions, and videos.
- One or two students will present the information to the class.
- One student will be in charge of writing a ten question oral quiz to be given to the class at the end of the presentation.

Research:

All students will do the research. Students should divide up the research between the members of the group.

Your PowerPoint should include the following:

1. A definition or description
2. Dangers and consequences
3. Examples
4. What can be done to protect yourself
5. Include at least one video

You will have two class days in the computer lab to complete this assignment.

Day 1 – Surf the net and gather information. Transfer information you want to use to your PowerPoint presentation. **Save all information on a flash drive.**

Day 2 – Finalize your PowerPoint presentation. Develop your ten question oral quiz.

Be ready to present your PowerPoint to the class on day three.
