

# Black Lines

Dear Parents,

We have been studying how weather is different in other areas than where we live. We have looked at other states in class today to see how our weather is different from theirs. Our assignment today is to go online to [www.worldweather.com](http://www.worldweather.com) and compare our weather to that of another continent. Please record your findings on the Global Weather Tracker paper provided, and return to class on the date due. Thanks for your help with this.

## Global Weather Tracker

City: Temperature: Climate:	A drawing of what I would be wearing in this city:
