

## Number Flexibility Instructions

### Materials:

- \*Number Flexibility Board
- \*Counters to cover numbers or dry erase marker
- \*Starting Number Cards
- \*Target Number Cards

### Procedures:

- 1) Pass out 1 Number Flexibility Board to each student.
- 2) Pass out counters or dry erase marker to each student.
- 3) Group students from 2-4 players
- 4) Starting Number Cards go face down next to Target Number Cards.
- 5) A Starting Number Card and Target Card are turned over.
- 6) Each student on their boards subtract numbers on the squares from their board from the starting number until they reach the target number. They have to in turn explain their process.
- 7) If student does computation wrong they lose that turn and have to uncover the numbers they tried to use.
- 8) First person to clear all the squares - wins!
