

Risk and Responsibility Web Resources

Step #1: Go to the following website:

<http://www.theiei.org/edu/orderpick.asp>

Step #2: (It's FREE!) Register by filling out your school information and creating a username and password.

Step #3: Log in using the username and password that you have created.

Step #4: Order any or all of the following (don't forget to allow time for shipping):

Option #1 : On How Insurances Work (FREE FOR TEACHERS)

Risk~Responsibility~Reality

Risk, Responsibility, Reality: How Insurance Works is a supplemental learning tool for high school teachers to educate students about insurance and risk management. This program is a DVD with printed supplemental materials designed to explain the basics of insurance, especially as they are relevant to high school students now or in the foreseeable future, and help students apply them to everyday situations that they can relate to. The program also promotes personal responsibility as a route to controlling risk.

In addition, an effort has been made to tie the DVD concepts and lesson plans to national content standards in several subject areas to help enhance the current curriculum and provide an additional "ready-made" resource to help teach mandated subject areas.

Option #2 : Insurance Industry (FREE FOR TEACHERS)

CD-ROM Lesson

Available Now: A CD-ROM Resource For High School Students

[Download Lesson Plan](#)

The Missouri Insurance Education Foundation (MIEI) recently completed a Windows-based CD-ROM that introduces high school students to the insurance industry. The Glenn Jourdon Family Foundation provided initial funding for this project, which was supplemented by gifts and contributions from Missouri insurance companies.

This CD introduces students and teachers to the insurance industry in a fun and interesting way. Students go to a "virtual theater" to see pre-show slides, previews, and short features illustrating "how we all benefit from insurance." An arcade section of the virtual theater teaches some basic insurance concepts including what is a risk and what makes things and people insurable. Other information includes what types of jobs are available as well as how the industry is structured.

In addition to the multi-media introduction to the industry, the CD-ROM

contains more detailed, searchable text and graphic information on the insurance industry. An interested student or teacher could use this information for research assignments or for a more detailed exploration of the industry.

Also as a part of this project, the foundation has activated a web site (www.miei.org) that provides students and teachers with a ready source of additional information about the insurance industry, including links to other insurance-related sites. In the future, this site will be used to update information on the CD.

The insurance content on the CD is licensed from BISYS Educational Services (formerly Pictorial) (www.bisyseducation.com), a leading publisher of training materials for the insurance industry. The CD was produced for MIEI by Human Dynamics (www.hodynamics.com).

Not-for-profit schools may obtain an evaluation copy of the CD at no cost. Additional copies can be obtained for a small shipping and handling fee and by completing the evaluation form sent with the CD. Orders can be placed by ordering on-line through The Insurance Education Institute's web site or by contacting the Missouri Insurance Education Foundation directly at PO Box 1654, Jefferson City MO 65102 (573-893-4234).

Option #3 : Next Generation (FREE FOR TEACHERS)

Next Generation: Insuring Your Future - Second Edition

Next Generation: Insuring Your Future - Second Edition is an entertaining, educational classroom module, aimed at helping high school and community college students understand the role of life and health insurance in financial planning. Through this program, LIFE hopes to assist educators in preparing their students for the "real world" financial decisions they will soon face.

Teachers ordering Next Generation will receive an easy-to-use teacher's kit consisting of the following materials: a 22-minute video, a 28-page educator's guide, student magazines, and a classroom poster. The video is designed to generate student interest by using language and style to which they can relate. The

video draws on elements of current pop culture and features real-life stories that illustrate how life, health and disability income insurance have had a positive effect on the lives of other young adults.

The educator's guide includes detailed background information on insurance concepts and the different types of insurance, reproducibles, a glossary of terms, a teacher survey and a list of organizations to contact for additional information. The kit includes thirty (30) copies of a 12-page student magazine entitled "Risky Business." Using specially written articles and worksheets, this unit is designed to give young people additional information about how insurance works and how to apply that information to their own needs.

Option #4 : Automobile Insurance (FREE FOR TEACHERS)

Wrecked: Life and Death on the Road

Every time you get behind the wheel, you have thousands of choices ahead of you. Nobody can make them for you. As a driver, you're on your own. The WRECKED Video and Roadbook are going to help you see what it means to make good and bad decisions on the road. What you take away from this experience is up to you.

You'll see some facts, read some stories, and meet a few young people who have already learned about driving the hard way. You'll be asked to think about how you feel, and question what you may know. In the end, you'll be better prepared to decide what kind of driver you want to be.

WRECKED is sponsored by Farmers Insurance as part of its Y.E.S. (You're Essential to Safety) Program. It's a proven fact that safe drivers cost less to insure. Farmers knows that smart drivers are less likely to

make mistakes. Educating young adults about the realities of the road is an important way to manage the cost of insurance — for Farmers and for you.
