

VOCABULARY FEMALE REPRODUCTION STUDENT WORKSHEET (Primary)

Name _____

Hour _____

1. Cervix (SER-vix):

2. Clitoris (KLIT-or-us):

3. Endometrium:

4. Estrogen:

5. Fertilization (conception):

6. Menstruation:

7. Menstrual cycle (MEN-stroo-al):

8. Ova (OH-vah)--plural, Ovum (OH-vum)—singular:

9. Ovaries:

11. Fallopian tubes:

12. Ovulation (OV-u-lay-shun):

13. Progesterone:

14. Urethra:

15. Uterus (You-ter-us) (womb):

16. Vagina (vah-JINE-ah):

VOCABULARY FEMALE REPRODUCTION TEACHER KEY (Primary)

1. **Cervix (SER-vix):** opening from the uterus to the vagina.
2. **Clitoris (KLIT-or-us):** a small, pea-shaped bump at the front of the labia that contains erectile tissue (counterpart to male penis).
3. **Endometrium:** lining of uterus.
4. **Estrogen:** the hormone responsible for secondary sex characteristics and for the sex drive in females.
The egg producing hormone.
5. **Fertilization (conception):** a sperm entering an ovum.
6. **Menstruation:** release of dead endometrial tissue and blood.
7. **Menstrual cycle (MEN-stroo-al):** the process of passing the blood and tissue lining of the uterus from the body.
8. **Ova (OH-vah)--plural, Ovum (OH-vum)—singular:** the female reproductive cell.
9. **Ovaries:** organs holding a woman's eggs.
10. **Fallopian tubes:** two tubular structures leading from the ovaries to the uterus.
11. **Ovulation (OV-u-lay-shun):** time when the egg is released from the ovary.
12. **Progesterone:** builds up the lining of the uterus to prepare it for the fertilized ovum.; the egg-setting hormone.
13. **Utethra:** below clitoris, the opening to bladder.
14. **Uterus (You-ter-us) (womb):** place where the baby grows in a woman's abdomen.
15. **Vagina (vah-JINE-ah):** passageway between the uterus and the outside of a woman's body.
