System	Organ	Problem	Symptoms	Results
Respiratory	Trachea	Describe what has malfunctioned with the organ.	Because of the malfunction, what are the symptoms that the individual would experience?	What is actually happening in the body because of the malfunction? This should include macroscopic and microscopic descriptions.

System	Organ	Problem	Symptoms	Results
Circulatory	Heart Valve	Describe what has malfunctioned with the organ.	Because of the malfunction, what are the symptoms that the individual would experience?	What is actually happening in the body because of the malfunction? This should include macroscopic and microscopic descriptions.

Group Assignments 2 of 4

System	Organ	Problem	Symptoms	Results
Circulatory	Heart Chamber	Describe what has malfunctioned with the organ.	Because of the malfunction, what are the symptoms that the individual would experience?	What is actually happening in the body because of the malfunction? This should include macroscopic and microscopic descriptions.

System	Organ	Problem	Symptoms	Results
Skeletal	Vertebral column	Describe what has malfunctioned with the organ.	Because of the malfunction, what are the symptoms that the individual would experience?	What is actually happening in the body because of the malfunction? This should include macroscopic and microscopic descriptions.

System	Organ	Problem	Symptoms	Results
Muscular	Diaphragm	Describe what has malfunctioned with the organ.	Because of the malfunction, what are the symptoms that the individual would experience?	What is actually happening in the body because of the malfunction? This should include macroscopic and microscopic descriptions.

Group Assignments 3 of 4

System	Organ	Problem	Symptoms	Results
Nervous	Spinal cord	Describe what has malfunctioned with the organ.	Because of the malfunction, what are the symptoms that the individual would experience?	What is actually happening in the body because of the malfunction? This should include macroscopic and microscopic descriptions.

System	Organ	Problem	Symptoms	Results
Digestive	Stomach	Describe what has malfunctioned with the organ.	Because of the malfunction, what are the symptoms that the individual would experience?	What is actually happening in the body because of the malfunction? This should include macroscopic and microscopic descriptions.

System	Organ	Problem	Symptoms	Results
Digestive	Large Intestine	Describe what has malfunctioned with the organ.	Because of the malfunction, what are the symptoms that the individual would experience?	What is actually happening in the body because of the malfunction? This should include macroscopic and microscopic descriptions.

Group Assignments 4 of 4

System	Organ	Problem	Symptoms	Results
Digestive	Liver	Describe what has malfunctioned with the organ.	Because of the malfunction, what are the symptoms that the individual would experience?	What is actually happening in the body because of the malfunction? This should include macroscopic and microscopic descriptions.

System	Organ	Problem	Symptoms	Results
Excretory	Kidney	Describe what has malfunctioned with the organ.	Because of the malfunction, what are the symptoms that the individual would experience?	What is actually happening in the body because of the malfunction? This should include macroscopic and microscopic descriptions.
