

Greenhouse Instruction Sheet

1. Fold paper in half, the short way.

2. Poke the scissors through both layers of the construction paper and cut out the middle section, leaving a 1 inch border. Write your name and team name on the border.

3. Fill the bottom part of the zip-lock bag with cotton balls and place the seeds between the cotton balls and the bag so they can be easily seen. Your teacher will tell you how many seeds to plant.

4. Spray about 10 squirts of water into the bag. Seal the bag.

5. Staple the bag into the frame. Your greenhouse is ready to be hung up. (Your teacher will tell you how to do this)
