

## ***Creature Observations***

Name \_\_\_\_\_ Team \_\_\_\_\_

Creature Observed \_\_\_\_\_

Questions to think about as you observe your creature:

- What does it eat?
- How does it eat?
- How does it move?
- Where does it live?
- How does it reproduce?
- Is it harmful or helpful?

List the things you already know about your creature.

List the things you can learn by observing your creature.

What do you wonder about your creature?

What living things do you think the creature needs in its environment to stay alive?

What nonliving things do you think the creature needs in its environment to stay alive?

Draw your creature. Measure your creature and record its size.
