

# CMaP Workshop Participation Agreement

*Summer 2014*

If accepted as a participant in the Summer 2014 CMaP workshop, I agree to complete the following CMaP workshop and post-workshop activities listed below within one month of completing the workshop:

1. I have a solid foundation in working on the Windows &/or Mac platform and with accessing and navigating online resources.
2. Complete evaluations of the activities related to the CMaP workshop.
3. Complete a detailed CMaP project description using project template, which includes: steps and procedures, core standards, student artifacts, photographs, lesson plan(s), and assessments.
4. Give permission to include my CMaP project in an archive of sample projects that will be made available to educators in Utah.
5. I have provided a home e-mail address and home phone number or cell phone number. Virtually all communication will be done via e-mail, and therefore the address provided is one that I have frequent access to throughout the coming weeks, including when school is no longer in session.
6. I will complete my community mapping project with my students during the 2014-2015 school year, investigating a selected local issue or problem along with a community partner, using GPS and GIS technologies from the CMaP workshop.
