## Grades 9-12, Prompt for Informative / Explanatory Writing Common Core Standard W.CCR.2

Great historical events often have deep effects upon the people who live through them. Depending on the person and the situation, those effects can be very different – or not.

The Great Depression of the 1930s, in the United States, was one of these events. Lasting for nearly ten years, the Great Depression closed thousands of banks, put millions of people out of work, and seared itself into the memory of those who lived through it.

The President of the United States, Franklin D. Roosevelt, responded by creating new government programs to help Americans, known as the New Deal.

You are going to read four texts about the Great Depression: a memoir called *Digging In* by Robert Hastings, a poem “Debt” by Karen Hesse, a short text about the programs of the New Deal of President Roosevelt, and President Roosevelt’s second inaugural address to the nation in 1937. As you read and re-read these texts, think about what the texts show you about how the Great Depression seems to have affected the individual people who lived through it.

Finally, using these texts, you will write an essay, explaining your thinking.

For the essay, your Focusing Question is:

**According to these texts, what effect did the Great Depression have on people who lived through it? Be sure to use evidence from the texts to support and develop your thinking.**

Remember, a good informational essay:

- *Has a clear introduction*
- *States a focus/topic clearly, precisely, and thoughtfully*
- *Uses specific evidence from the text(s) to support and develop the topic and explains that evidence*
- *Concludes effectively*
- *Uses precise language*
- *Shows control over conventions*

You will have three class periods to complete this reading/thinking/writing task. The essay will have a single draft, and you may want to take some time to plan your writing before you begin work. When you have finished, be sure to proofread.

**Informative / Explanatory Writing**  
**Common Core Standard W.CCR.2**  
**9-12**

*Teacher Directions*

- The texts provide the information needed to address the prompt, and students should independently read the texts carefully before writing. Encourage students to refer back to the text while writing and to take notes, and to mark up the text as much as is helpful to them.
- Students should be given three sessions for the prompt. Allow approximately 45 minutes for each, but the prompt should not be strictly timed. Students should be given as much time as needed to plan, write, and proofread.
- The writing must be done without help, but students may have access to personal dictionaries, or any other resources to support spelling and mechanics that they are accustomed to using while writing.
  - Be sure students have paper to take notes or do whatever pre-planning they might choose to do.
  - If students are writing by hand, provide lined paper from your classroom for writing. If they are using a word processor, make sure they save their work so it can be accessed the next day.
- This will be first draft writing, but encourage students to proofread and correct any errors they find.

## Digging In

By Robert J. Hastings

The closing of Old West Side Mine meant the end of anything resembling a steady job for the next eight years. From 1930 on, it was a day's work here and a day's work there, a coal order from the welfare office, a few days on WPA, a garden in the back yard, and a few chickens and eggs.

We weathered the storm because of Dad's willingness to take any job and Mom's ability to stretch every available dollar. It was not so much a matter of finding a job as of filling in with odd jobs wherever and whenever you could, and most of the "jobs" were those you made for yourself.

My diary shows that Dad sold iron cords door to door, "worked a day in the hay," bought a horse to break gardens, rented an extra lot for a garden on the shares, picked peaches, raised sweet potato slips, traded an occasional dozen of eggs at the grocery, hung wallpaper, "painted Don Albright's house for \$5," picked up a day or two's work at the strip mines, guarded the fence at the county fairgrounds, cut hair for boys in the neighborhood, sold coal orders, and when he had to and could, worked intermittently on WPA.

With no dependable income, we cut back on everything possible. We stopped the evening paper, turned off the city water and cleaned out our well, sold our four-door Model T touring car with the snap-on side curtains and isinglass, stopped ice and milk delivery, and disconnected our gas range for all but the three hot summer months. There was no telephone to disconnect, as we didn't have one to start with!

We did keep up regular payments on two Metropolitan Life Insurance policies. Page after page of old receipt books show entries of 10 cents per week on one policy and 69 cents a month on another. As long as we could, we made house payments to the Marion Building and Loan, but a day came when we had to let those go, too.

Fortunately, we were able to save our house from foreclosure. When so many borrowers defaulted, the Marion Building and Loan went bankrupt. Creditors were allowed to pay just about any amount to satisfy the receivers. But that was the catch – who had "just about any amount" to pay? A house behind ours sold for \$25. Many good houses in Marion sold for \$5 to \$100 and were torn down and moved to nearby towns. We settled with the loan company for \$125, or ten cents on the dollar for our \$1250 mortgage. I'll never forget the day Dad cleared it all up, making two or three trips to town to bring papers home for Mom to sign. He was able to borrow the \$125 from his aunt, Dialtha James, who as the widow of a Spanish-American war veteran had a small pension.

Looking back, I find it amazing what we did without. A partial list would include toothpaste (we used soda), toilet paper (we used the catalog), newspaper or magazine subscriptions, soft drinks, potato chips and snacks, bakery goods except bread and an occasional dozen of doughnuts, paper clips, rubber bands and restaurant meals. We had no water bill, sewer bill, telephone bill, no car expenses – gasoline, tires, batteries, licenses, insurance, repairs – no laundry service, no dry

cleaning (we pressed woolens up with a hot iron and wet cloth), no bank service charge (no bank account), no sales or income tax. We sent no greeting cards except maybe half a dozen at Christmas...

Typical of the simple economies Mom practiced was keeping the electric bill to \$1 a month and the gas bill to \$1 a month in June, July, and August....Since our only appliance was an electric iron, the chief use of electricity was for lighting. With only a single bulb suspended by a cord from the ceiling of each room, there weren't many lights to burn...On winter evenings, Mom would turn on the kitchen light while she cooked supper. If I had lessons I brought them to the kitchen table or sprawled on the floor between the kitchen and dining room.

After supper we "turned off the light in the kitchen" and moved to the dining-sitting room, where another light was switched on. If we wanted to read on winter afternoons, we sat as near a window as possible, with the curtains pinned back, to save the lights until it was nearly dark...

Dad had some old-fashioned shoe lasts, and he would buy stick-'em-on soles at the dime store to patch our shoes in winter. With simple barber tools he cut my hair and that of other kids in the neighborhood, for maybe ten cents a head. In cold, wet weather, when he worked outdoors on WPA, he often cut strips of cardboard to stuff in the soles of his shoes and keep his feet warm.

We took care of what we had. Every cotton cloth was used over as a dish cloth, wash cloth, dust cloth, shoe-shining cloth, window-washing cloth, to scrub and wax floors, make bandages, make quilt pieces, make kite tails, or to tie boxes and papers together. The cotton bags from flour, salt, and cracked chicken feed were washed, bleached, and cut into dish cloths and towels. Some neighbors made curtains or even dresses from feed sacks. Every paper bag was saved for lunches or cut and used for wrapping paper. String was wound into balls for later use.

Each August Mom would find someone who was a year ahead of me in school, and buy his used books. One exception was a spelling book used in all eight grades. Since it was to be used for eight years, we decided it would be a wise investment to buy a new one when I started first grade. In the seventh grade, I dropped that speller in the snow. I thought Mom was unfair when she sent me all the way back to school, retracing my steps to look for the book...

Before the Depression, we hung a four-cornered black-and-white cardboard sign in the front window each morning. The figures in the corners told the iceman how many pounds to bring – 25, 50, 75, or 100. But ice was one of the casualties of the Depression, although we managed a small piece two or three times a week for iced tea. About eleven in the morning I would pull a little wagon, filled with a gunny sack and assorted old quilts and tarpaulins, down to the neighborhood ice house to buy a "nickel's worth of ice," which was half of a 25-pound chunk. By wrapping it carefully and storing it in a cool, damp spot under the house, we could stretch that piece of ice for two or three days. In rainy, cool weather, maybe four days! It was our glistening prize, and any left over from tea was emptied back into a pitcher of ice water, or used for lemonade that afternoon. So as not to waste any, we chipped only what was needed, with much of the same care used by a diamond cutter.

Whatever was free was our recreation. This may have included playing records on our wind-up victrola or listening to the radio. You might watch a parachute jump at the airport or a free ball game at the city park, with perhaps a free band concert afterwards...the band concerts survived only the first two years of the Depression...

We liked music, and one of my earliest memories is of Dad singing to me:

Two arms that hold me tight,  
Two lips that kiss goodnight;  
To me he'll always be,  
That little boy of mine.

No one can ever know,  
Just what his coming has meant:  
He's something heaven has sent,  
That little boy of mine.

At one point in the Depression, the cupboard was literally bare of money. We weren't hungry, but we were penniless. Then Dad went back in the pantry and came out with a jar in which he had saved a few nickels and dimes for such an emergency.

Later, Mom said to me, "I've learned that whatever happens, your Daddy always has a little dab of money put back somewhere..."

## Debts

By Karen Hesse

Daddy is thinking  
of taking a loan from Mr. Roosevelt and his men,  
to get some new wheat planted  
where the winter crop has spindled out and died.  
Mr. Roosevelt promises  
Daddy won't have to pay a dime  
till the crop comes in.

Daddy says,  
"I can turn the fields over,  
start again.  
It's sure to rain soon.  
Wheat's sure to grow."

Ma says, "What if it doesn't?"

Daddy takes off his hat,  
roughs up his hair,  
puts the hat back on.  
"Course it'll rain," he says.

Ma says, "Bay,  
it hasn't rained enough to grow wheat in  
three years."

Daddy looks like a fight brewing.

He takes that red face of his out to the barn,  
To keep from feuding with my pregnant ma.

I ask Ma

how, after all this time,

Daddy still believes in rain.

“Well, it rains enough,” Ma says,

“now and again,

to keep a person hoping.

But even if it didn’t

your daddy would have to believe.

It’s coming on spring,

and he’s a farmer.”

March 1934

## The New Deal

In 1932 [Franklin Delano Roosevelt](#) was elected overwhelmingly on a campaign promising a New Deal for the American people. Roosevelt worked quickly upon his election to deliver the New Deal, an unprecedented number of reforms addressing the catastrophic effects of the Great Depression. Unlike his predecessor, [Herbert Hoover](#), who felt that the public should support the government and not the other way around, Roosevelt felt it was the federal government's duty to help the American people weather these bad times.

Together with his "brain trust," a group of university scholars and liberal theorists, Roosevelt sought the best course of action for the struggling nation. A desperate Congress gave him carte blanche and rubber-stamped his proposals in order to expedite the reforms. During the first 100 days of his presidency, a never-ending stream of bills was passed, to relieve poverty, reduce unemployment, and speed economic recovery.

His first act as president was to declare a four-day bank holiday, during which time Congress drafted the Emergency Banking Bill of 1933, which stabilized the banking system and restored the public's faith in the banking industry by putting the federal government behind it. Three months later, he signed the Glass-Steagall Act which created the FDIC, federally insuring deposits

The [Civil Conservation Corps](#) was one of the New Deal's most successful programs. It addressed the pressing problem of unemployment by sending 3 million single men from age 17 to 23 to the nations' forests to work. Living in camps in the forests, the men dug ditches, built reservoirs and planted trees. The men, all volunteers, were paid \$30 a month, with two thirds being sent home. The [Works Progress Administration](#), Roosevelt's major work relief program, would employ more than 8.5 million people to build bridges, roads, public buildings, parks and airports.

The National Industrial Recovery Act (NIRA) and the National Recovery Administration (NRA) were designed to address unemployment by regulating the number of hours worked per week and banning child labor. The Federal Emergency Relief Administration (FERA), created in 1933, gave \$3 billion to states for work relief programs. The Agricultural Adjustment Act subsidized farmers for reducing crops and provided loans for farmers facing bankruptcy. The Home Owners' Loan Corporation (HOLC) helped people save their homes from foreclosure.

While they did not end the Depression, the New Deal's experimental programs helped the American people immeasurably by taking care of their basic needs and giving them the dignity of work and hope.

*President Franklin Roosevelt took office in 1932, during the worst depression American had ever known. The stock market had crashed in 1929, thousands of banks had failed, millions of people were unemployed. Until 1932, there was no safety net for the country, with no government help, so people were on their own.*

*During his first term of office, Roosevelt created a program called the New Deal, in which government took a huge role in putting people back to work, creating Social Security, and creating many types of government assistance for people.*

*Roosevelt was overwhelmingly re-elected in 1936. What follows is the speech he made at the inauguration for his second term.*

## **Second Inaugural Address, President Franklin D. Roosevelt**

### **January 20, 1937**

My fellow countrymen. When four years ago we met to inaugurate a President, the Republic, single-minded in anxiety, stood in spirit here. We dedicated ourselves to the fulfillment of a vision—to speed the time when there would be for all the people that security and peace essential to the pursuit of happiness. We of the Republic pledged ourselves to drive from the temple of our ancient faith those who had profaned it; to end by action, tireless and unafraid, the stagnation and despair of that day. We did those first things first.

Our covenant with ourselves did not stop there. Instinctively we recognized a deeper need—the need to find through government the instrument of our united purpose to solve for the individual the ever-rising problems of a complex civilization. Repeated attempts at their solution without the aid of government had left us baffled and bewildered...

We of the Republic sensed the truth that democratic government has innate capacity to protect its people against disasters once considered inevitable, to solve problems once considered unsolvable. We would not admit that we could not find a way to master economic epidemics just as, after centuries of fatalistic suffering, we had found a way to master epidemics of disease. We refused to leave the problems of our common welfare to be solved by the winds of chance and the hurricanes of disaster.

In this we Americans were discovering no wholly new truth; we were writing a new chapter in our book of self-government.

This year marks the one hundred and fiftieth anniversary of the Constitutional Convention which made us a nation. At that Convention our forefathers found the way out of the chaos which followed the Revolutionary War; they created a strong government with powers of united action sufficient then and now to solve problems utterly beyond individual or local solution. A century and a half ago they established the Federal Government in order to promote the general welfare and secure the blessings of liberty to the American people.

Today we invoke those same powers of government to achieve the same objectives.

Four years of new experience have not belied our historic instinct. They hold out the clear hope that government within communities, government within the separate States, and government of the United States can do the things the times require, without yielding its democracy. Our tasks in the last four years did not force democracy to take a holiday.

Nearly all of us recognize that as intricacies of human relationships increase, so power to govern them also must increase—power to stop evil; power to do good. The essential democracy of our nation and the safety of our people depend not upon the absence of power, but upon lodging it with those whom the people can change or continue at stated intervals through an honest and free system of elections. The Constitution of 1787 did not make our democracy impotent.

Our progress out of the depression is obvious. But that is not all that you and I mean by the new order of things. Our pledge was not merely to do a patchwork job with secondhand materials. By using the new materials of social justice we have undertaken to erect on the old foundations a more enduring structure for the better use of future generations...

In this process evil things formerly accepted will not be so easily condoned. Hard-headedness will not so easily excuse hardheartedness. We are moving toward an era of good feeling. But we realize that there can be no era of good feeling save among men of good will.

For these reasons I am justified in believing that the greatest change we have witnessed has been the change in the moral climate of America.

Among men of good will, science and democracy together offer an ever-richer life and ever-larger satisfaction to the individual. With this change in our moral climate and our rediscovered ability to improve our economic order, we have set our feet upon the road of enduring progress.

Shall we pause now and turn our back upon the road that lies ahead? Shall we call this the promised land? Or, shall we continue on our way? For "each age is a dream that is dying, or one that is coming to birth."

I see a great nation, upon a great continent, blessed with a great wealth of natural resources. Its hundred and thirty million people are at peace among themselves; they are making their country a good neighbor among the nations. I see a United States which can demonstrate that, under democratic methods of government, national wealth can be translated into a spreading volume of human comforts hitherto unknown, and the lowest standard of living can be raised far above the level of mere subsistence.

But here is the challenge to our democracy: In this nation I see tens of millions of its citizens—a substantial part of its whole population—who at this very moment are denied the greater part of what the very lowest standards of today call the necessities of life.

I see millions of families trying to live on incomes so meager that the pall of family disaster hangs over them day by day.

I see millions whose daily lives in city and on farm continue under conditions labeled indecent by a so-called polite society half a century ago.

I see millions denied education, recreation, and the opportunity to better their lot and the lot of their children.

I see millions lacking the means to buy the products of farm and factory and by their poverty denying work and productiveness to many other millions.

I see one-third of a nation ill-housed, ill-clad, ill-nourished.

But it is not in despair that I paint you that picture. I paint it for you in hope—because the nation, seeing and understanding the injustice in it, proposes to paint it out. We are determined to make every American citizen the subject of his country's interest and concern; and we will never regard any faithful law-abiding group within our borders as superfluous. The test of our progress is not whether we add more to the abundance of those who have much; it is whether we provide enough for those who have too little.

Government is competent when all who compose it work as trustees for the whole people. It can make constant progress when it keeps abreast of all the facts. It can obtain justified support and legitimate criticism when the people receive true information of all that government does.

If I know aught of the will of our people, they will demand that these conditions of effective government shall be created and maintained. They will demand a nation uncorrupted by cancers of injustice and, therefore, strong among the nations in its example of the will to peace.

Today we reconsecrate our country to long-cherished ideals in a suddenly changed civilization. In every land there are always at work forces that drive men apart and forces that draw men together. In our personal ambitions we are individualists. But in our seeking for economic and political progress as a nation, we all go up, or else we all go down, as one people.

In taking again the oath of office as President of the United States, I assume the solemn obligation of leading the American people forward along the road over which they have chosen to advance.

**File Name: I 11/12P Hope During The Great Depression**

**Informative / Explanatory**

**Grades 11-12**

**On-Demand Writing, Uniform Prompt**

### **Hope During The Great Depression**

Life is difficult. Sometimes, it is devastatingly so. Yet the human race can be defined by the dual characteristics of perseverance and hope. We, the human race, are the infamous turtle of Steinbeck's *Grapes of Wrath*, we take each obstacle in stride and keep on going on. The Great Depression is one of the best examples of humankind's tendency towards both perseverance and hope. The fact that so many people managed to live through the terrible poverty of the Great Depression is a testament to the tenacity of hope and optimism in humans, and Americans in particular.

The texts provided for this analysis all discuss the Great Depression and its effects on the people who lived through it. On the whole, the theme translated from the texts is that the people who survived the Great Depression developed, as a direct result of the Depression, a curiously strong sense of optimism. President Franklin D. Roosevelt, in his Second Inaugural Address, attributes this sense of optimism to democracy, and its "...innate capacity to protect its people against disasters once considered inevitable, to solve problems once considered unsolvable." Roosevelt is, of course, making a blunt reference to his popular and effective programs under the New Deal. It is true that the New Deal had come at just the right moment, and that millions of people were helped through the New Deal, particularly the WPA, or Works

Progress Administration, which was, as put in the fourth source from PBS, a "major work relief program...[employing] more than 8.5 million people to build bridges, roads, public buildings, parks and airports." 8.5 million people is a lot of people to employ, and based upon these facts alone it would seem that the New Deal was indeed reason to hope.

Yet the other sources, and indeed even later on in Roosevelt's speech, indicate that such hope was perhaps misplaced, at least in the extent that the hope was placed upon Roosevelt. In "Digging In", the second source written by Robert J. Hastings, the narrator reflects on her father's efforts to get money: "it was a day's work here and a day's work there...a few days on the WPA..." Thus, it seems that although the WPA may have employed 8.5 million people, it was not by any means a source of income, if people were only able to work for a few days at a time. However, the focus of "Digging In" is not to evaluate federal programs, but to evaluate the effectiveness of one's own efforts to help oneself. More than anything, the lengths to which the narrator's family went in order to save money exemplifies, once again, an incredible amount of perseverance. From the selling of the car, to the renouncement of milk and ice, the family maintains their perseverance and their hope. Towards the end of the passage, the narrator's mother speaks of this imperative hope: "I've learned that whatever happens, your Daddy always has a little dab of money put back somewhere..." Whether or not this was true, it certainly seems to be a sentiment that enabled the family to maintain their sanity

In Roosevelt's speech, there is a section in which he employs anaphora to give emphasis to the negative effects of the Depression by repeating, for several lines, "I

see..." followed by a sad image, thought, or idea. He finishes the anaphora with "I see one-third of a nation ill-housed, ill-clad, ill-nourished." While this rhetorical emphasis is used mainly to lead into his positive images to follow, in order to be more convincing towards his audience, the negative scenes which he describes were not only rhetorical, but quite real. People were homeless and clotheless and foodless during the Great Depression, millions of them. That is why it is so incredible that the primary effect of such a tragedy was to create a generation of hopeful people. Such hope is characterized in the first source, a poem by Karen Hesse entitled "Debts". In this poem, the narrator describes that "Daddy is thinking/ of taking a loan from Mr. Roosevelt and his men..." This connection to the New Deal emphasizes that the government, through President Roosevelt, helped instigate the massive flood of hope in the American people. The dad in the poem wants to buy wheat even though such an idea is completely impractical; the dad is a naively hopeful character.

As the "Ma" says in the last phrase of the poem, "well, it rains enough...to keep a person hoping./But even if it didn't/your daddy would have to believe." This quote defines succinctly the mind-set amongst Americans living in the Depression that hope will lead to greatness. Perhaps this was because Americans could do nothing else but hope, and work, and trust in the leaders of their country. It is human nature, after all, to do everything one can to keep oneself going. Thus, the Depression imprinted a sense of hope on the people that lived through it. It is a sense of hope that has not been witnessed to the same extent in our time, yet hope continues to persevere in humans.
