

## Pattern Alterations for Shoulders and Bust Cups

**Shoulders:** If diagonal wrinkles appear at underarm (more noticeable in back sometimes), pointing toward the neckbase, the shoulder probably slopes.

**Sloping shoulders** require dropping the end of the shoulder and the underarm on both bodice front and back.

Pulling against shoulder seams and horizontal wrinkles running across the top of the upper back, with a deep horizontal wrinkle at the back neck base indicate square shoulders. **Square shoulders** require raising the shoulder end and the underarm.

**Forward rolling shoulders** are shoulders that have moved forward and are no longer in line with the ears. Bodice front, back and sleeve all need alterations. A slanted wrinkle forms on the bodice front running from underarm toward base of neck. Bodice back appears tight and horizontal wrinkles appear across upper back. Shoulder seam appears

to be too far back. Sleeve cap pulls up and is too tight.

## Bust Cup Adjustments

**Enlarge- left Reduce- right**

**Dartless- far right**

**Add 3/8" width and length from B to C and C to D . Reduce 1/4" in width and length for B to A.**

**See DVD.**
