

## BUDGET FOR A YOUNG MARRIED COUPLE

John and Mary were married shortly after they graduated from technology school. They planned a budget, but it is difficult to save money for their future goals. They want to take a vacation in 6 months. The travel agent has told them about a 3-day trip to Disney World that includes hotel and airfare for \$1200. They would like to take an additional \$500 for meals and entertainment expenses. The total they would need for the trip is \$1700.

Using the figures below, complete the monthly budget form on the following page. First list the “**Planned**” budget amounts that John and Mary decided on. Then list the “**Actual**” expenses they had during the month in the column marked Actual. Decide whether each item is a fixed expense (those which are a specific amount each month) or a flexible expense (those which vary in amount each month). List each amount in the appropriate place on the budget form. Sam and Sue's combined net monthly income is \$1700.

John and Mary's current budget includes the following items (**Planned Expenses**):

Rent	\$395	Personal Care	\$90
Electricity	\$30	Gas and oil	\$110
Car Payment	\$225	Medical care	\$30
Telephone	\$35	Entertainment/Leisure	\$200
Clothing	\$125	Gifts/Contributions	\$80
Car insurance	\$50	Food	\$260
Life insurance	\$20		

John and Mary's actual expenses for this month were (**Actual Expenses**):

Rent	\$425	Personal Care	\$98
Electricity	\$23	Gas and oil	\$126
Car Payment	\$225	Medical care	\$50
Telephone	\$42	Entertainment/leisure	\$135
Clothing	\$195	Gifts/Contributions	\$56
Car insurance	\$50	Food	\$260
Life insurance	\$20
