
UNIT: Teaching Practicum

LESSON: Teaching Evaluation

COMPETENCIES:

1. Students will complete self evaluations as well as evaluations on the presentations of other class members.
 2. Students will complete assigned observations.
-

OVERVIEW/SUMMARY:

Personal and class evaluations of your teaching in the child care center are a critical part of the teaching process.

MOTIVATOR:

There is an old saying, "You haven't finished the job until the paper work is through." This statement is very true when running a child care center. There will be many forms and papers to wade through. One very important form is the evaluation you complete after teaching in a child care center. This evaluation tells you where you should go next and how to improve your teaching.

LESSON OPTIONS/SUPPLIES:

OPTION 1

EVALUATION FOR CHILD CARE TEACHERS: Have students complete the evaluation form after completing a day of teaching child care. You may wish to have students evaluate one another, have the cooperating teacher evaluate the students, or complete an evaluation yourself. It may be helpful to copy the evaluation on the back of the lesson plan form your center uses.
