

Science Center

Students will:

- Develop skills in observation, exploration, description, making comparisons, and classification.
- Investigate relationships using resources.
- Use problem solving strategies.

Science Center

Rules

Observe and explore carefully.

Take care of tools.

Return things when you are finished.

Share what you have learned (e.g., orally, pictorially, written).

Questions:

What do you wonder about?

What is interesting to you?

What do you know about ____?

About what do you want to learn more?
