

Dewey Decimal Matching

Summary

This is a simple Dewey Decimal matching lesson. It helps teach students how the library is organized using the Dewey Decimal system.

Time Frame

2 class periods of 30 minutes each

Group Size

Large Groups

Materials

- SMART Board
- Computer
- LCD projector
- Simple Dewey Decimal Chart

Background for Teachers

The teacher should explain that the library is organized using the Dewey Decimal system. That is where all the non-fiction books are located. Each section should be defined and explained so the students have some idea of what books go where.

Student Prior Knowledge

The students should have had prior training on what the Dewey Decimal system is and how it is used in the library.

Intended Learning Outcomes

The students will be able to locate specific texts within specific Dewey Decimal locations.

Instructional Procedures

Teachers will go over how the library is organized. Teachers will go over what types of text will be in each division of the Dewey Decimal system. Teachers will then use the SMART Board lesson to test what the students have learned.
