

My Mineral Book

Summary

Students will create a "foldable" book to share the 5 characteristics of a mineral.

Time Frame

1 class periods of 60 minutes each

Group Size

Individual

Materials

per student:

- 1 sheet paper
- colored pencils
- markers or crayons
- textbook or notes

Instructional Procedures

Explain to student that they will be creating a mini-book to share the 5 characteristics of a mineral with a younger student.

Help the students create the book with a stapler or folding technique.

Explain that there should be a title page, each additional page should have one of the characteristics, an explanation and a picture. The last page should describe the author.

Allow time to work.

Share excellent examples with the class.
