

KSL Weather Project

Summary

Students will track various weather factors for a week.

Time Frame

5 class periods of 15 minutes each

Group Size

Individual

Materials

- computers with Internet access
- [Student worksheet](#)
(attached)

Background for Teachers

Students will be watching the weather during the week. They will record the forecasted high and low temperatures for each day. In addition, they will record what kind of weather occurs, for example: cloudy, rainy, cold, clear, sunny, etc. The actual temperatures on the following day will also be recorded. All data will be entered into their student worksheet attached.

Instructional Procedures

All directions and procedures are found on the [student worksheet](#) attached.

Bibliography
