

Cartoon Chemistry

Summary

Students will compare characteristics of groups of elements on the periodic table. They will create a cartoon for a typical element of one group.

Time Frame

1 class periods of 60 minutes each

Group Size

Individual

Materials

- [student sheet](#)
(attached)
paper
colored pencils

Instructional Procedures

Read introduction and directions with students.

Allow students time to fill in their data table and begin their cartoons. Collect some of the better cartoons (example below) and make overheads of them to show the next class.
