

# Lower Grade Basketball Activities

## Summary

Children will gain experience with a basketball and proper techniques.

## Group Size

Pairs

## Life Skills

Communication, Social & Civic Responsibility

## Materials

One basketball for every two children.

## Intended Learning Outcomes

Students should be able to demonstrate basic knowledge about how to use a basketball properly.

## Instructional Procedures

Model the following techniques before asking the students to perform them:

- Self-toss a basketball and catch it before it bounces twice.
- While sitting on the floor, roll a ball back and forth between your partner.
- Count by numbers, months of the year or alphabet.
- Dribble a ball, using your fingerpads, (area underneath fingernails).
- Stand, feet together, and self-roll a ball around your feet.
- Underhand toss a ball to your partner.
- Perform a basic bounce pass to your partner.
- Dribble around your partner.
- Dribble a ball from a kneeling or seated position.
- Toss the ball underhand or overhand toward a target to improve your throwing skills.
- Catch a ball using properly positioned hands.
- Dribble the ball continuously and with control.

## Strategies for Diverse Learners

If a student is afraid of catching a ball, have their partner literally hand the ball to them while still showing proper form or use a softer ball.
