Franklin says "I Love You" by Palette Bourgeois
The Berenstain Bears, The Week at Grandmas by Stan & Jan Berenstain
Teacher Resources:
Easy And Effective Ways To Communicate With Parents (Scholastic)

Background for Teachers

Because of their limited prior knowledge, children often presume that all families are the same as their own. Children need to be exposed to similarities and differences in other families, identifying attributes in themselves and others, which make each person and family special and unique. Hopefully, these activities will help children be more respectful and accepting of others.

Intended Learning Outcomes

Intended Learning Outcomes

1. Demonstrate a positive learning attitude.
2. Demonstrate social skills and ethical responsibilities.
5. Understand and use basic concepts and skills.
6. Communicate clearly in oral, artistic, written and nonverbal form.

Process Skills

Symbolization, observation, description, classification, problem solving

Instructional Procedures

Invitation to Learn

Read the book *Patterns* by Samantha Berger. Clap different patterns and have the children listen and try to clap the same pattern back.

Instructional Procedures

1. Grouping families—Picture Cards
: Parents may send a family portrait to school with their child. Together the children will share and discuss contributions of family members. They will find cards that represent members of their own family and place them in an order—Oldest/Youngest, Biggest/Smallest, Tallest/Shortest, First, Second, Third, etc. If the class has too many students to do this activity, family chains may be made instead, using stampers.
2. How is my family the same as other families and how is my family different?
Forming groups with other children, example: children who have a grandparent living with them or who live with a grandparent stand together behind the picture of grandparents.
3. Clap Family Patterns:
After the children have been successful with several clapping patterns, the teacher will clap the pattern of his or her family. Example: Clap, Clap, pause, and one, two, three (mom, dad, and

three children). Each child will be given the opportunity to clap their family pattern (or a pattern of their choosing) and have everyone try to clap the pattern back.

Extensions

Possible Extensions and Adaptations

Special Needs:

The teacher could stand behind a child and help him or her clap a pattern by gently holding their hands on the outside of the child's hands and clapping with them.

Extended Activities: Read one of the shape books listed. Have the children stand and hold shapes of different colors, cut out of construction paper, to form patterns, and string beads into patterns of different shapes and colors. Pattern cards can be purchased or made by the teacher. Read *The Shape Hunt* by Sharen L. Young, and take the students on a shape hunt around the school.

Family Connections

Family skill bags: flash cards of numbers 1-20, small shapes of different colors cut out of construction paper, lined paper, a number line 1-20, crayons and a pencil.

Parent and Child Timeline Questionnaire, Homework: (Ages one, two, three, four and now) What did your child do at these different ages? What can your child do now that they could not do when they were two? etc. Return & share with the class.

Assessment Plan

Observe the interactions of the children to see if they are making family connections.

Math Pattern Assessments: Ask the children to make patterns with shoe laces and beads or with math colored counters or unifix cubes.
