INSTRUMENTS OF CHANGE

Sunday, February 8 at 8 p.m.

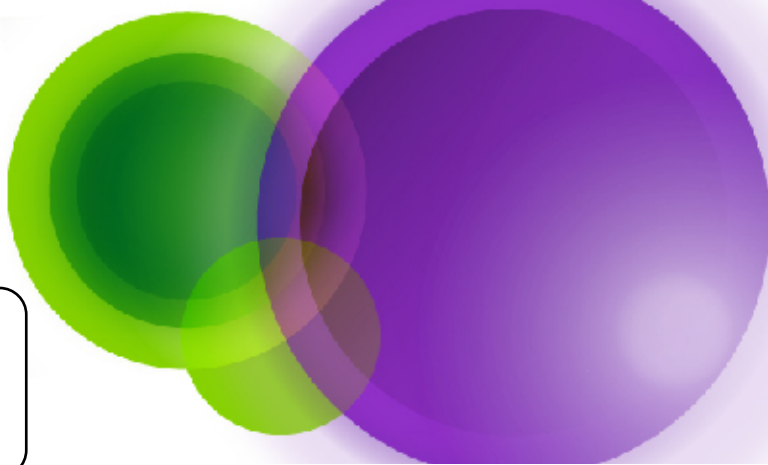

History credits the inceptions of the Civil Right movement to Montgomery, Alabama in the mid-1950's. In Miami, as early as 1951, there existed a Fine Arts Conservatory dedicated to bringing music, dance and art to young black and white students in an integrated environment . The film shows the power the performing arts has in bringing a community together and features intimate interviews, emotional footage and photographs along with archival and current day performances from those who participated in these nearly forgotten endeavors.

With the combination of the roll out of the Affordable Care Act and the shift of Baby Boomers into their retirement years, it is more important than ever to get back the basics on health care. Most people understand that the health care landscape has changed, but many questions remain. How do our health care options change as we get older? What are the best questions to ask when seeking out a plan? For those who are just getting the hang of Medicare, what needs to be re-learned in the wake of the ACA?

SILENT MAJORITY

Tuesday, February 24 at 9 p.m.

Drugs and alcohol rank as the number-one health issue for American teens, killing more young people than all traffic accidents combined. Kids are more vulnerable to substance abuse and thus, more susceptible to addiction; stopping often requires more than will power. A surprising truth lay behind these disheartening statistics: more than 70% of teens actually make good choices about drugs and alcohol, debunking the myth that most teens participate in the partying culture. A new documentary puts the spotlight on this "Silent Majority." The film gives some interesting answers as to what teens want and their desire to stay drug-, alcohol- and tobacco-free.
