

HUMAN

Framework for AI Implementation

H Hone the Goal

- Will the interaction directly align with a core standard?
- What is the intended impact on learning, and how will you assess the impact?

U Understand Limitations

- Will the interaction depend on artificial intelligence's ability to provide factual information or in-depth expertise?
- Can the artificial intelligence tool consistently mediate the interaction in a meaningful way?

M Mitigate Risks

- Has the artificial intelligence tool been vetted and approved by your LEA?
- How will you prevent over-reliance on AI while promoting students' creativity and critical thinking skills?

A Assess the Interaction

- Will students reflect on the interaction?
- Will students critique the artificial intelligence's responses or compare them to human-generated ideas?

N Nurture Human Connection

- Will the interaction replace, shorten, extend, or deepen a human interaction?
- Will the interaction support students' individuality while promoting a sense of classroom community?

Teacher-Facing Use Cases

- Summarizing texts
- Generating readings
- Creating exemplars
- Generating written instructions
- Revising emails and newsletters
- Creating vocabulary lists (with definitions and examples)
- Generating close notes from slide decks
- Writing spreadsheet formulas

Student-Facing Use Cases

- Engaging in role play activities and simulations
- Requesting feedback
- Participating in practice debates
- Rephrasing instructions
- Engaging in on-the-spot formative quizzes
- Reviewing foundational concepts and skills
- Receiving support for complex projects

UEN'S AI Toolkit

uen.org/aitoolkit

UEN's AI toolkit includes everything you need to navigate the current AI landscape: teaching resources, guiding frameworks, professional development opportunities, a running bibliography of the latest research on AI-enhanced pedagogy, and a variety of how-to guides and explainers.

UEN's Free, Self-Paced AI & Student Learning Course

Enroll today to learn more about how to integrate AI into your classroom safely and effectively.
