

Canvas in Utah

Statewide Usage & Impact Report

April 2024 - April 2025

May 30, 2025

Dear UEN Board and Team,

On behalf of all of us at Instructure, we want to express our deepest appreciation for the incredible partnership we have shared for over a decade. Together, we have helped expand access to high-quality education for every student across Utah, providing educators the platform to deliver scalable, equitable learning opportunities through Canvas LMS across the entire K-20 system.

The work we have done together has had a lasting impact on educators and learners alike. Even before the pandemic, Canvas enabled a forward-thinking approach to digital teaching and learning, helping local education agencies and institutions of higher education recognize the importance of a robust learning management system. When faced with the unprecedented challenges of rapid adaptation during the pandemic, Canvas became a critical tool for educators to stay connected with their students, providing prompt, reliable support no matter where learning was happening.

What is especially remarkable is how this positive experience, coupled with the great support provided to educators and administrators by the UEN and Instructure teams, built trust and sustained use well beyond the pandemic. Today, Canvas continues to move Utah students forward, enabling anytime, anywhere learning while keeping them connected and engaged with their teachers. This widespread adoption has provided Utah learners with a standardized, streamlined way to access educational resources, whether learning in a physical classroom or online through the expanded virtual learning opportunities available. Just as importantly, Canvas has built a bridge between K-12 and higher education, allowing learners to seamlessly transition into new academic environments with the confidence and skills they need to succeed.

We are proud of the work we have accomplished together, and we deeply value the partnership that has made this all possible. Thank you for your vision, collaboration, and unwavering commitment to supporting students and educators. We look forward to continuing this important work together for many years to come.

With sincere gratitude,

Melissa Loble

Executive Summary

Instructure & UEN

Driving Equitable, Connected Learning Statewide

Instructure & UEN

Driving Equitable, Connected Learning Statewide

Partnering with Utah Education Network to Empower Learners Statewide

For [more than a decade](#), Instructure and the Utah Education Network have partnered to deliver a consistent, equitable digital learning experience for all students across Utah. Through the statewide implementation of Canvas, Utah's educators, students, and families - from kindergarten through college - benefit daily from a high-quality, reliable learning platform.

This work has been further supported by the **Digital Teaching and Learning Grant Program**, which helps LEAs implement long-term plans to strengthen digital learning statewide.

What This Partnership Delivers:

- **Statewide Canvas Access**
UEN's investment in a statewide Canvas license ensures that all educational institutions in Utah have access to a leading LMS with a robust partner ecosystem, creating a unified learning experience across the K-20 continuum.
- **24/7 Tier 1 Support**
Canvas users in Utah benefit from Instructure-provided Tier 1 24x7, giving instructors, students, and guardians assistance at any time.
- **High-Impact Professional Development**
The Professional Development team at UEN supports LEAs across the state with targeted and personalized training, helping educators integrate Canvas into instruction in ways that drive student engagement and academic success.

Using Canvas helps our district meet our goal to provide a consistent learning experience for same grade-level students across schools. The Blueprint feature specifically has helped us meet this objective. Canvas is a great place for teachers and students to work collaboratively - sharing resources and supporting learning. Online course availability enables students to access course content regardless of time or place.

Cache works in close collaboration with USU - our local university and concurrent enrollment higher ed institution - which also uses Canvas as their LMS. Providing the same platform offers a seamless transition for our students to access curriculum and course resources.

Mary Darnell and Andrew Clark
Cache County School District

Case Studies

At **Utah State University**, Canvas supports personalized, competency-based learning - offering students flexibility and ownership of their education journey.

[Read the full case study](#)

In **Davis School District**, Canvas helps build a stronger sense of community through seamless communication and instructional alignment across schools.

Instructure & UEN

Driving Equitable, Connected Learning Statewide

Canvas: Utah's Digital Learning Hub from K - 20

Canvas isn't just a tool, it's the foundation of digital learning across Utah. As the unified platform used statewide, Canvas provides structure, connection, and personalization at every stage of the learner journey - from early education through higher education and career readiness. The Impact of Canvas in Utah includes:

- **Equity at Scale**
Students across Utah, regardless of location, income, or individual learning needs, have equitable and inclusive access to digital learning.
- **Personalized Learning**
Canvas supports differentiated instruction, enabling teachers to tailor learning to the unique needs and interests of each student.
- **Connected Communities**
With built-in tools for communication and collaboration, Canvas keeps students, parents, teachers, and administrators aligned and informed.
- **Consistency Through Every Step**
From the first day of kindergarten to the final day of college, Utah students use Canvas as their consistent learning environment - building digital fluency, academic continuity, and a strong foundation for those who go on to teach in Utah using the very system they learned on.
- **Continued Professional Learning**
Canvas supports educator growth statewide through ongoing professional learning - including UEN-delivered courses via Canvas Catalog and training offered at the local institutional level.

Prior to the pandemic, Canvas allowed for a forward thinking approach to digital teaching and learning. As a platform, Canvas helped local education agencies to see the importance of digital tools, specifically a learning management system. During a period requiring teachers to rapidly adapt, Canvas enabled educators to effectively support learners with prompt and reliable connections.

Canvas was instrumental in enabling remote learning during the pandemic but has provided continual support when students need to be absent from the physical school environment. This positive experience fostered trust, leading educators to consistently use Canvas even after the pandemic ended.

Canvas has consistently moved students forward to have anytime, anywhere learning and still manage to connect and engage with their classroom educator. Consequently, widespread adoption has provided Utah students with a standardized method for receiving information from their teachers, which has helped simplify educational processes across the state.

Additionally, Canvas being used across K-20 education systems in Utah has allowed learners to seamlessly move from their K-12 classroom experience to a higher education environment.

Canvas Usage Data

April 2024 - April 2025

How To Read Usage Data

Active Users

“Active Users” means enrolled in an active course and logged in at least once in the given month.

Active Courses

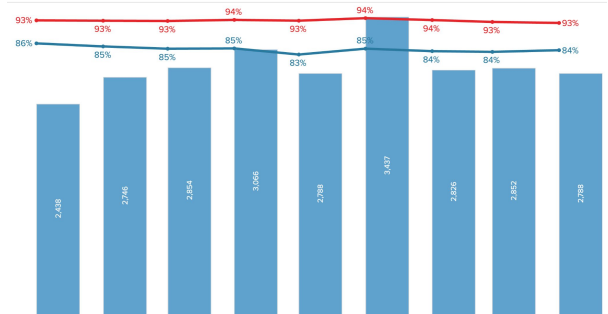

The blue bars in the graphs below represent active courses.

“Active Courses” are defined as courses that meet the following criteria:

- At least one enrolled teacher with recorded activity time
- At least three enrolled students with recorded activity time
- The course includes a defined term or start/end date
- At least four unique user logins within the current month

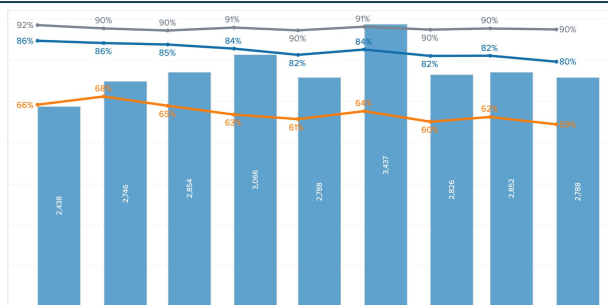

Content & Activity Overview

Activity Detail

- % Monthly Active Courses with Assignments
- % Monthly Active Courses with Quizzes
- % Monthly Active Courses with Discussions

Note: New Quizzes usage is accounted for in the Assignments line.

How To Read Usage Data

LTI Usage

The top five Learning Tools Interoperability (LTI) tools for each LEA were identified based on total launch counts within their Canvas instance.

Some LEAs used fewer than five LTIs, so only two or three may be listed. In rare cases where no LTI activity was recorded, that is also indicated.

Total Number of Students (K-12) and Number of Unique Users (HED)

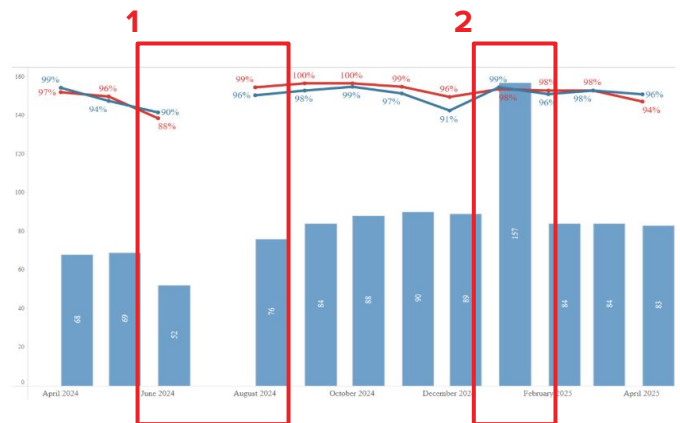

To help contextualize the number of active Canvas users reported in Instructure data dashboards, we've included the total student enrollment for each K–12 LEA, along with the number of secondary students (where applicable), using [publicly available data](#) from the Utah State Board of Education (USBE).

For higher education institutions, we've included the number of unique users, defined as the total count of distinct individuals who have logged into Canvas at least once over the past 12 months.

Seasonal Gaps or Spikes in Data

1: Some graphs show low or missing data during summer months, reflecting a natural drop in Canvas usage when many institutions are not in session.

2: Some spikes in January are expected due to overlapping course start and end dates during that time.

Inconsistent Baselines

In some graphs, bars and lines use different percentage baselines, so their "zero" points may not align visually. When comparing values, focus on actual values rather than visual height for accurate comparisons.

Unified Tools. Consistent Learning. Statewide Impact.

Utah's Canvas implementation, powered by the partnership between Instructure and UEN, continues to provide a reliable digital foundation for teaching and learning across K-20.

Thank you.
