Google Glass Defined

Google Glass is a wearable technology that augments what you see and work with in the real world with information through Google, apps, and other services that are available to you either with your voice, gestures, or through the connection with your smartphone.
Google Glass

- Connect over wi-fi
- Connect to phone

In Our Opinion

Hands Free

- Picture taking
- Directions
- Video
- Access to critical information - Google
- How tos
- Note taking
- People with disabilities
What is Glass Good For?
Glass Infographic

These are just a sampling of the educational uses of Google Glass. As the technology improves and is more affordable, we’re bound to see more educational uses.

online-phd-programs.org
Glass in Education

- First person video guides
- Flipped Classroom
- Field Trips - Students are the tour guides
- Virtual Field Trips with Google Hangouts
- Educators broadcast from inside the classroom, leading science labs, group discussions or even performing surgery for remote audiences. They show it in real time through Google+ hangouts and as videos shared later through YouTube, personal blogs and other forms of social media.
Google Glass in Education

- Google Glass community
- Would you want Google glass in class?
- 365 Days of Glass
- 30 Ways
What Glass Can’t Do

- Look into the future
- Take a selfie
- Can’t wear them all day long - 3.5 battery life
- Can’t wear them with regular glasses
- Can’t afford them - $1500 for limited functionality
Google Glass in Action

- Taking a picture and sending it to a Google+ friend
- Recording a video and sharing it with a Google + friend
- Asking Google a question or show you a picture
- Have a conversation in Google hangouts
