

Don Peterson, Lindon City  
Board Member  
Utah Storm Water Advisory Committee

Dear Mr. Peterson,

My name is Doug Andersen and I teach 9<sup>th</sup> grade geography at Oak Canyon Junior High School in Lindon. This year I would like to involve my students in a community service learning project that includes GIS and GPS technology. I am considering a project involving the storm drainage system in Lindon City. I understand that you are a board member of the Utah Storm Water Advisory Committee and would like to meet with you to discuss the possibility of creating a student study and mapping project involving Lindon's storm drainage system.
