Historical Building Mapping Project

My name is Carl Lyman. I teach at the American Leadership Academy in Spanish Fork, Utah. My classes are interested in a community service project as part of our class. We are interested in partnering with you in the project.

In the project we would like to locate the following types of buildings and structures: Old home, Topaz buildings & homes, hay derricks, concrete silos, inside outside graineries, old canals, old home steads, old barns, etc. As part of data collection for the project we would take photos of the structures, mark their GPS location, write a brief history where possible. When the project is finished we would produce maps of the different kinds of structures, a booklet of the project, pod casts of the stories so visitors could listen to a story of the structure as they visit and find it. We are interested your cooperation in accessing resources and your help with funding if possible.

Thank you for your consideration and I am looking forward to you visiting and communicating with you as soon as possible.

Carl Lyman, Teacher
