

My name is Terri McGuire and I teach fifth grade at Syracuse Arts Academy, an elementary school in Davis County. <http://www.syracuseartsacademy.org> This year I would like to involve my students in a community-based service learning project that involves GPS and GIS technology. I am considering a project to map the fixed art objects and arts resources in Davis County. It will involve authentic learning, as students will utilize handheld GPS units, ArcView mapping software, digital photography, interviewing, presentation skills and a published project. These skills are important for students, as they are interrelated to the job market of the future. (Include time frame and core standards) (Include benefits to community)

I understand that you are a board member of the Davis County and I would like to meet with you to discuss the possibility of creating a student study and mapping project involving the arts resources in Davis County.
