

First Grade: Informative Writing

Prompt: The difference between moths and butterflies

Name: Liv

The difference is butterflies
are more thin then moths.
Moths are more thick then
butterflies. They both becom
caterpitaras when they hach.
Moths are fluffy & butter-
flies are thin & not so
fluffy at all. They both
hach from a cocoon they
both seem kind of the
same but they are not.
~~The End~~
