

Instructions for how to assemble the flipbook:

1. Obtain 3 pieces of 8 ½" by 11" white computer paper.
2. Layer each piece on top of the other so that 1" of space remains showing on the bottom of each paper.
3. Fold all three papers down, horizontally, so that 1" of space remains on the bottom of each flap.
4. Staple ½" from the top of the flip book.
5. Assemble another flipbook and staple it to the first completed flipbook, so that they are back to back, and the flaps show on each side.
6. Label each flap on the bottom 1" space according to above diagrams.
