

### CURVED LINES

Sew on the first two lines with a #3 stitch length and the needle in the center position. Sew the next two lines with a #1 stitch length and the needle in the far left position. Your stitches will not be on the line. Sew the last two lines with a #5 stitch length with the needle in the far right position. Again, your stitches will not be on the line. Backstitch a few stitches at the beginning and the end of each line.
