

FIGURE TYPE ASSIGNMENT

NAME _____ PERIOD _____ DATE DUE _____

1. Draw the 4 basic figure types as described in class.

a.

b.

c.

d.

2. Discover your figure type by evaluating the measurements further that you took in the proportion assignment.

Compare the shoulder measurement with the hip measurement. If they are the same or within 1 inch of each other then you have an average figure type.

If the shoulders are 2 inches wider than the hips, you would have an inverted triangle figure type.

If the hips are 2 inches wider than the shoulders, you would have a triangle figure type.

If your waist measurement is 12 inches or more less than your shoulder and your hip measurement, you would have an hour glass figure type.

What is your figure type? _____

3. Prepare a written evaluation on your figure type. Include your measurements and how you arrived at your conclusions.
