

TEXTILE BINGO

1. A hair-like substance that is made into threads is called a fiber.
2. A yarn is a result of twisting many fibers together.
3. Natural fibers have a plant or animal origin.
4. Synthetic fibers are made by man.
5. Rayon was the first synthetic fiber.
6. Cotton is a natural fiber that is cool, absorbent, and wrinkles easily.
7. Wool is a warm, spring, natural fiber from sheep.
8. Silk is a natural and lustrous fiber that is made from worms.
9. Linen is a natural fiber made from the flax plant.
10. Rayon is a synthetic fiber made from wood pulp.
11. Felt is a nonwoven fabric.
12. Nylon is a synthetic fiber that is very strong but light weight. It tends to build up static electricity.
13. Polyester is a synthetic fiber known for it's resistance to wrinkling and retention of oily stains.
14. Spandex is a synthetic fiber that stretches and is often used for swimwear.
15. Acrylic is a synthetic fiber that is soft, warm, and light weight. It is used a lot in sweaters.
16. Stock dyeing is when masses of fibers, such as wool or cotton are placed in the dye bath.
17. When nylon burns it forms a tan bead.
18. Heat setting is a finish that adds design effects, such as pleats, into the fabric.
19. Silk screen is one type of resist printing.
20. Durable press is a finish which keeps garments smooth and wrinkle free.
21. Sizing is a finish where starch is applied to a fabric.
22. A blend is the combination of two or more fibers giving the characteristics of each.
23. The plain weave is the most common basic weave.
24. Kodel is a brand name.
25. The filling of a fabric is called crosswise grain.
26. Filament fibers are long fibers.
27. The strongest threads in a woven fabric are the warp threads.
28. Short fibers are called staple fibers.
29. Another word for grain is threads.
