

TEACHER INFORMATION

NAME THAT FABRIC

This assignment is to match the fabric to its name and definition.

PREPARATION

You will need to:

1. Prepare samples swatches of each fabric, 21 in all. Cut enough so each student can have one sample of each fabric.

(TIP** use your rotary cutters to minimize work, stress and strain. This is a good job for a T.A.!)

2. Put a sample of each fabric into a zip lock bag, one for each student or have students work in groups of 2-3 to minimize number of samples needed.
3. Run copies of the NAME THAT FABRIC worksheets.
