1. Originally, wallpaper was used by the poor to copy something used by the rich. What was it?
2. What is it called when the lower 3 or 4 feet of a wall is finished differently from the rest of the wall?
3. What are the three components a designer always uses?
4. What is a wall that suggests movement and attracts attention called?
5. What is a wall called that is used as a background element and does not attract attention? (Off white wall treatments and wallpaper with fine prints fall into this category.)
6. What kind of prints or stripes are used to make a wall appear to be taller?
7. How do small scale patterns in light colors make a wall appear?
8. Colors should coordinate with, but not overpower the furniture. What do walls that exactly match the color or pattern of the furniture seem to make the furniture do?

- _____ 9. What kind of wall supports some weight from the ceiling or roof? (These are used most commonly for exterior walls, as well as some main partitions.)
- _____ 10. What kind of trees do hardwoods come from? (These trees lose their leaves at the end of each growing season and are broadleaf trees.)
- _____ 11. What kind of trees do softwoods come from? (These trees are cone-bearing trees and typically have needle-shaped leaves that do not shed.)
- _____ 12. What type of floor coverings are carpeting and rugs?
- _____ 13. The quality of a carpet is determined by the thickness of the pile. What is another word for thickness?
- _____ 14. Carpets that will wear longer have many of these per square inch of surface area.
- _____ 15. A cushion that protects a carpet and provides more comfort to the user. It improves the carpet's appearance and length of life.
- _____ 16. What type of floor coverings are smooth, hard materials that return to their original shape? They are made in either sheet or tile form. Some examples of this type of covering are asphalt, cork, rubber, vinyl, and poured seamless floors.
- _____ 17. What type of covering is the first decision to be made when decorating a room?
- _____ 18. When shades, shadows, texture, and color are added to a line drawing to achieve realism in a presentation drawing for a client, what is it called?
- _____ 19. This is a board that contains drawings such as floor plans and elevations and any other information necessary to help the client visualize a finished product. A large piece of mat board or illustration board is used for mounting samples, drawings, and photos in a logical, attractive format. Manufacturers' samples of carpeting, draperies, upholstery, and paint may be included. Pictures of individual pieces of furniture may also be included.
- _____ 20. What kind of layout includes samples of carpeting, draperies, upholstery, paint, and wood?
- _____ 21. What are three-dimensional representations of a design idea called?
- _____ 22. What type of finish reflects light, is shiny, and shows flaws?

- _____ 23. What is the least glossy of the enamels that is used in kitchens, bathrooms, and hallways?
- _____ 24. What type of paint provides excellent wear and should be used on surfaces that need frequent scrubbing?
- _____ 25. This wall covering is made from grass bonded to paper. It is expensive and difficult to clean.
- _____ 26. What is a paint that is in-between flat and glossy?
- _____ 27. What type of paint must be thinned and cleaned up with turpentine, mineral spirits, or solvent?
- _____ 28. What type of rolls is wallpaper usually priced in?
- _____ 29. What type of wallpaper may be wiped clean and even scrubbed without hurting the design?
- _____ 30. What type of wallpaper has had the paste applied during the manufacturing process?
- _____ 31. What type of match is done when a wallpaper has a small print where the same design needs to be at the top of each panel and matched along the seams?
- _____ 32. What type of match is done when a wallpaper has such a large print that every other panel starts with the same design?
- _____ 33. What type of number identifies a certain group of wallpaper all printed at the same time? (Papers with different numbers should not be used on the same wall.)
- _____ 34. What type of match is done when a wallpaper does not have a specific design that requires matching the design on two adjoining panels?
- _____ 35. What type of paint is cleaned up with water?
- _____ 36. Are you alive?
